TCS visited FET

TCS visited FET on May 05, 2017 for having one on one interaction with students and faculty.

Editorial

Dear Readers,

In the year 2017, we organized various workshops in different disciplines and also hosted invited lectures in the FET. We also organized the fresher's and orientation sessions for the new students of first year.

Once again congratulations to the FETians, for being selected as the Reporting and Help Center for aspirants of engineering courses by MHRD, Govt. of India

I would like to congratulate to the winning team of ESL who pushed the limits to have such a wonderful game. We will soon be hosting more game events in the coming months. I appreciate the efforts of participants and the faculty members who made this event a success.

My best wishes are with the toppers of this semester and I expect from other students to put more efforts in the studies, so they can also be among the winners. We at FET have always encouraged the buddies engineer's and also have provided them with support and direction to achieve new goals.

I encourage the student volunteers who worked with the faculty members as a team to take the cleanliness drive to another level by cleaning the hostel rooms, galleries, classes and mess. Various activities were organized under Swatchhta Pakhwada event during the 15 days of September. Volunteers and NSS coordinators put their efforts to make this event successful by contributing to the society and to the surroundings of the FET.

Every day comes with new hopes and new possibilities; I would like to encourage students to come up with new ideas to serve the nation and the society around them. In the end I wish you all a very Happy Deepawali and a Happy New Year.

वेदों में वर्षा का वर्णन

ऋग्वेद में कहा गया यह सत्य है कि कान्तिमान, बलिष्ठ रुद्रदेव के पुत्र येमरुद्गण (बादल) मरुभूमि में भी अवात (वायु शून्य) स्थिति से वर्षा करते हैं । अर्थात् यह कथन ऋग्वेद के अनुसार भी सत्य है और मौसम विशेषज्ञों के अनुसार भी की जहाँ वायु का कम दबाव वाला (लो प्रेशर) क्षेत्र बन जाता है, वहाँ बादल इक्कठे होकर बरस जाते हैं ।

गुरुकुल कांगड़ीं में मार्च 24,1927 को गाँधी जी द्वारा दिये गये भाषण से :

स्वामी जी का देहान्त हुआ ही नहीं है। देहान्त तो तब होगा, जब हम उनकी सच्ची देह को मिटाने की कोशिश करेंगे, अगर्चे कि सच्ची बात तो यह है कि हमारी कोशिश से भी उनकी देह का नाश होने को नहीं है – जब तक यह गुरुकुल कायम है, जब तक एक भी स्नातक गुरुकुल की सेवा करता है, तब तक स्वामी जी जीते हैं । स्वामी जी का शरीर तो किसी दिन गिरने को था ही ।

पर स्वामी जी का सबसे बड़ा काम गुरुकुल है, उन्होंने अपनी सारी शक्ति इसमें लगा दी थी, इसे पैदा करने में उन्होंने अधिक – से –अधिक तपश्चर्या की थी । तुमने सत्य की प्रतिज्ञा ली है । अगर तुम अपने वचन का पालन करोगे तो किसी की हिम्मत नहीं कि वह गुरुकुल को मिटा देवे ।

Tips and Tricks for Best WiFi Hotspot App

Whenever you have your laptop and wired connection at your work place and wants to have flawless internet connection for your mobile or hand held device. Then one app comes to mind is connectify hotspot, but it is not free and don't let you run your personalized wifi network for long time. Here are few free connectify alternatives, that you can use hassle-free and without paying anything.

1. OSToto Hotspot (Free)
It is a free and a great WiFi hotspot software. It comes with a simple interface, which lets you start your WiFi hotspot with a single click. Faster installation and usage of standard WPA2 PSK password security makes it easy and secure to use. Other features include ability to blacklist devices, set time when you want the hotspot to turn off, allow hotspot to run even when you hibernate the PC and more.

2. Baidu WiFi Hotspot (Free)
It has a great mix of simple and advanced features; the good thing is the advanced features never hinder the user experience. Apart from sharing your internet connection quickly, the software also lets you send and receive files from a device that's connected to the WiFi hotspot, which is a pretty handy feature. Baidu WiFi Hotspot is fast, smooth and it's also free.

3. Thinix WiFi Hotspot (Paid)
It is a great internet sharing software, which along with simple internet sharing brings a few cool intuitive features, like it lets you configure the hotspot the way you want. Along with that, you can prioritize devices, so if a device of yours is streaming a video, you can give it a higher priority in the settings, so that there is no waiting in playback. Thinix offers you a free trial for a week in which you can use the hotspot for 15 minutes every day.

4. Virtual Router Plus (Free)
It is a popular WiFi hotspot software for a while now and it is the simplest WiFi hotspot app you will ever come across. The software has no additional features and it's not really a bad thing as long as you only want the WiFi hotspot feature. You can configure the name and password of the hotspot and you can start or stop it; Virtual Router Plus should be fine with a lot of people, who only want a stable WiFi hotspot software.

5. LionScripts WiFi Hotspot Creator (Free)
LionScripts WiFi Hotspot Creator is also a very simple WiFi hotspot enabling software. The software comes in two versions. One is a free version with ads and other is a paid version, without ads. As we mentioned, the software is pretty simple with only options to configure the name and password of the WiFi hotspot. There are also options to start hotspot with or without opening the software.

6. MyPublicWiFi (Free)
It is one of the oldest WiFi hotspot software and has not changed much. While the software does share your internet with ease, it also brings some cool advanced features that might come handy. The software lets you block any user's access and it also allows you to block features like file sharing over WiFi, which might eat up your bandwidth. MyPublicWiFi also features a URL logging feature, which logs all the websites visited from your WiFi hotspot. Overall, MyPublicWiFi continues to be a great WiFi hotspot software and it remains free to use.
